

# Tri-axial Groundborne Vibration Meter **VM-56**

The VM-56 is a groundborne vibration meter capable of simultaneously calculating the measurement quantities defined by DIN 45669-1, ISO 8041 and other national measurement standards. Like other Rion products, it is characterized by excellent build-quality and exceptional ease of use. It is suitable for a wide range of applications including attended measurements, unattended surveys and live-to-web monitoring.

Applicable standards

DIN 45669-1: 2010-09

(Measurement of vibration immission –Part 1: Vibration meters – Requirements and tests) \*Measurement range, measurement frequency range only ISO 8041: 2005, ISO 8041-1: 2017

(Human response to vibration – Measuring instrumentation)

## **High Quality & Easy of Use**

Simultaneous measurement of multiple parameters including PPV and VDV.

User definable PPV vs Frequency comparator output supports DIN 4150: Part 3 and other frequency-dependent PPV building damage criteria.

Simultaneous tri-axial measurement.
Compact and lightweight design.

Flexible product configuration with waveform recording function and 1/3 octave band analysis function available as optional programs.

Data stored as CSV files on an SD card.

Suitable for use in a live-to-web system (please contact us for further details).

# **Configuration Example for Remote Continuous Monitoring**

Measurement results and data from the VM-56 can be accessed by computers, tablets or smartphones via a network connection for continuous remote monitoring.

## **Mounting options**

DIN Plate VP-54D

L-bracket VP-54L

## **Option programs**

## Waveform Recording Program VX-56WR

56

Allows recording vibration waveforms on SD card as WAV files. The recording process is carried out simultaneously with the standard VM-56 functions.

2 kHz sampling with 24 bit or 16 bit can be selected

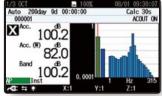

Max. recording time (at 16 bit)			
Memory card Sampling frequency	512 MB	2 GB	32 GB
2 kHz	Approx. 8 hours	Approx. 32 hours	Approx. 698 hours

# 1/3 Octave Band Analysis Program VX-56RT

Enables measurement and logging of 1/3 octave acceleration levels simultaneously with broadband parameters (e.g. PPV, Dominant Frequency, VDV, MTVV). Can be used concurrently with VX-56WR.

User definable weighting – enables compliance with ISO 2631-2:1989/RD1367

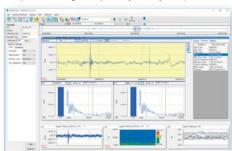

1/3 Octave Band Analysis screen

## **Software / Report Creation**

# Waveform Analysis software for Groundborne Vibration AS-70GV

Allows use of WAV files recorded with VM-56 + VX-56WR for graph display, level processing, frequency analysis (octave

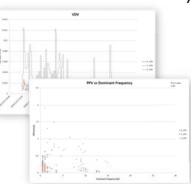

band analysis / FFT analysis), recalculation (PPV, KB, VDV), and file output.

# Excel macro for report output (Free of charge · Now available on our website)

Facilitates the creation of reports from measurement data.

- Data types: VM-56 auto store data, VX-56RT auto store data \*Manual store data are not supported
- Measurement target: PPV, displacement, acceleration (rms), VDV, MTVV, KB<sub>FT</sub> value, v<sub>eff,max.30</sub> value

Specifications  Applicable standards	DIN 45669-1: 2010-09 (Frequency, Measurement range compliance), SBR Meten
1,	en beoordelen van trillingen, Deel A: Schade aan gebouwen 2010, Deel B: Hinder
	voor personen 2013, ISO 8041: 2005, ISO 8041-1: 2017, CE marking, WEEE directive
Measurement functions	Tri-axial simultaneous measurement
Measurement values	THE ANIAL SHIRALA POSSES HOUSENESS HOUSE
In accordance	Peak particle velocity  v max (PPV)
with DIN	Dominant frequency fmg (D.F.)
	Weighted vibration maximum value KB <sub>Fmax</sub>
	Maximum KB <sub>F</sub> value over 30-second cycle KB <sub>FT</sub>
In accordance	Corrected acceleration effective value Acc.
with ISO	Maximum transient vibration value MTVV
With 150	Vibration dose value VDV
	Crest factor C.F.
In accordance	Maximum weighted vibration value V <sub>eff.max</sub>
with SBR	Maximum veff over 30-second cycle V <sub>eff, max, 30</sub>
Others	Displacement (0-p value) Disp.
Others	Combined PPV for 3 axes PVS
Mountain recording (Ontion)	
Waveform recording (Option)	Time waveform of acceleration signal a(t)
1/3 octave band	Time-weighted time average, maximum acceleration
analysis value (Option)	Tri-axial synthesis of band max overall Law
Measurement frequency range	0.5 Hz to 315 Hz
Frequency	For acceleration, velocity, and displacement signals, the following frequency range limits can be selected
bandwidth limits	Lower limit: 0.5 Hz, 1 Hz, 4 Hz
	Upper limit: 80 Hz, 100 Hz, 250 Hz, Sensor Dependent (LPF OFF)
Measurement range	Measurement frequency setting is 1 to 80 Hz, defining the following range
Measurement range	Vibration velocity: 0.03 to 100 mm/s
for VM-56	Weighted vibration amount: 0.02 to 100 mm/s (Reference 16 Hz)
	Maximum absolute waveform value: 0.05 to 100 mm/s (Reference 16 Hz)
	Vibration acceleration: 0.0003 to 10 m/s <sup>2</sup>
	Displacement (0-p): 0.01 to 10 mm (0.5 to 4 Hz)
	Measurement range compliant with SBR-Deel B
	Vibration velocity: 0.02 to 100 mm/s (Frequency bandwidth 1 to 80 Hz)
Instrument noise	
Vibration acceleration	0.0001 m/s² (Measurement frequency range 1 to 80 Hz)
Vibration velocity	Max. 0.01 mm/s (Measurement frequency range 1 to 80 Hz)
Frequency correction	No weighting (Common band filter for ISO and DIN / SBR band filter)
	KB (DIN 45669-1 compliant)
	Wb, Wd, Wm characteristics (ISO 8041 compliant)
	Hv (SBR-B compliant)
Measurement range	2 switchable ranges, separate for 3 axes: 0.001 to 10 m/s², 0.0001 to 1 m/s²
Dynamic range	Max. 100 dB
Sampling frequency	2 kHz
Store modes	3 modes (Manual, Auto, Timer Auto), Data format: CSV
Manual	Measurement results stored with measurement start time in one memory address
Iviariuai	
	Data stored in internal memory or on SD card (Internal memory: max. 1000 tri-axial
	data sets, SD card: dependent on card capacity)
	Processed value store: PPV, Dominant Frequency (D.F.), KB <sub>Fmax</sub> , MTVV, VDV, Crest Factor (C.F.)
	Displacement (Disp.), PVS, Overload and Under Range Flags for each calculation cycle.
Auto	Continuous storing of various types of processing results for each calculation cycle Data stored on SD card
	Store modes: Instantaneous store, calculation store, level trigger store
	Instantaneous store: Acc. rms data stored every 100 ms
	$\bullet \   \text{Processed value store: PPV, Dominant Frequency (D.F.), KB}_{\text{FT}}, \text{MTVV, VDV, Crest Factor (C.F.)}$
	Displacement (Disp.), PVS, Overload and Under Range Flags for each calculation cycle
	Calculation cycle: 1 s to 24 h
Timer Auto	Processed values are continuously recorded for each store cycle at the set
	measurement start / stop time.
	Sleep function (power save mode until measurement start) available Data stored on SD card
	Sleep function (power save mode until measurement start) available data stored on 3D cart
	Store modes: Instantaneous store, Calculation store
	Store modes: Instantaneous store, Calculation store Instantaneous store: Acc. data stored every 100 ms
	Store modes: Instantaneous store, Calculation store Instantaneous store: Acc. data stored every 100 ms Calculation store: Processing results for each calculation cycle
Measurement time	Store modes: Instantaneous store, Calculation store Instantaneous store: Acc. data stored every 100 ms Calculation store: Processing results for each calculation cycle Calculation cycle: 1 s to 24 h
	Store modes: Instantaneous store, Calculation store Instantaneous store: Acc. data stored every 100 ms Calculation store: Processing results for each calculation cycle Calculation cycle: 1 s to 24 h Max. 200 days (Auto store mode only, with 100 ms off)
Data recall	Store modes: Instantaneous store, Calculation store Instantaneous store: Acc. data stored every 100 ms Calculation store: Processing results for each calculation cycle Calculation cycle: 1 s to 24 h Max. 200 days (Auto store mode only, with 100 ms off) Store data name, store data browse, time browse, waveform yes/no check

RS-232C	communications	Using dedicated cable (I/O terminal)
Comparator output		Open-collector output (using I/O port)
		Max. applied voltage: 24 V
		Max. drive current: 50 mA (with 24 V applied voltage)
		Monitored Parameter: PPV (broad-band or user-definable PPV vs frequency function)*3
Power r	equirements	IEC R6 [size AA] battery x 8 or external power supply
Batter	y life (23 °C)	Alkaline battery LR6 (AA): 24 h , Ni-MH secondary battery: 24 h
		*Battery life will differ depending on settings.
AC ad	lapter	NC-98E
External p	oower supply voltage	5 to 7 V (rated voltage 6 V)
Curren	t consumption	Approx. 90 mA with factory default settings
Power	consumption	Approx. 7 VA on input side (220 V AC side)
Dust and	water proofing	IP54 rating (for main unit)*2
Ambient con	ditions for operation	-20 °C to +50 °C, 90 % RH or less (no condensation)
Dimensio	ons and weight	Approx. 175 mm (H) x 175 mm (W) x 40 mm (D) mm, approx. 780 g (incl. batteries)
SD card	i	SD / SDHC (max. capacity 32 GB)*1
LED		Two-color (red/blue) type for operation status indication
Supplied	d	Accelerometer PV-83D, Alkaline battery, IEC R6 (size AA) x 8,
accesso	ories	Case x 1, 512 MB SD card x 1, Calibration Certificate
Acceler	ometer	Rated sensitivity: 60 mV/(m/s²)
Tri-axial		Frequency range: 0.5 Hz to 315 Hz
	ccelerometer Usage temperature range: -20 °C to +60 °C (no condensation)	
PV-83D		Waterproofing: IPX7
(Cable:	1.5 m)	Dimensions and weight: Approx 67 mm (dia.) x 50.5 mm (D), approx. 450 g

#### Waveform Recording Program VX-56WR

Recorded signal	Acceleration	Data format	WAV format
Sampling frequency	2 kHz	Frequency correction	None
Bit word length	24 bit, 16 bit	Available channels for recording	3 channels (X, Y, Z)

#### 1/3 Octave Band Analysis Program VX-56RT

no ociare Bana	7 maryolo i rogram vit corri	
Analysis Basis	Acceleration	
Applicable standards	IEC 61260-1 2014 class 1, ISO 2631-2*, RD1367* * With user weighting	
Filters	1 Hz to 315 Hz (26 bands)	
Frequency weighting	None (band-limiting filter only) (Wb, Wd, Wm, User weighting)	
Store modes	Same store modes as VM-56, same processing values are stored.	
	Processing values listed below are also stored.	
Manual	Time average of 1/3 octave Acc for each calculation cycle, and time-weighted maximum value	
Auto/Timer Auto	Instantaneous store: Time-weighted instantaneous value of 1/3 octave Acc. every 100 ms	
	Calculation store: Time average of 1/3 octave Acc. for each calculation cycle,	
	and time-weighted maximum value	
Analysis target channels	3 channels simultaneously (X, Y, Z)	
User Weighting	Enables the user to set amplitude weightings for 1/3 octave band:	
	Frequency range: 1 Hz to 315 Hz	
	Adjustable range: +3.00 dB to -70.00 dB	

### Options

Product	Model	
Waveform Recording Program (supplied on 2 GB SD card)	VX-56WR	
1/3 Octave Band Analysis Program (supplied on 512 MB SD card)	VX-56RT	
Waveform Analysis Software for Groundborne Vibration	AS-70GV	
512 MB SD card	MC-51SD1	
2 GB SD card	MC-20SD2	
32 GB SD card	MC-32SP3	
AC adapter	NC-98E	
7P Extension Cable	EC-04 series	
BNC to RCA Cable	CC-24	
Comparator Cable	CC-42C	
RS-232 Serial I/O Cable	CC-42R	
USB Cable	_

L-bracket	VP-54L	
*1 Use RION fully guaranteed products		

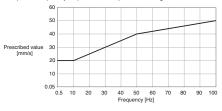

- Use RION fully guaranteed products.
- \*2 Protection against harmful dust and water splashing from any direction.

#### autions regarding waterproofing

Before use, verify that the rubber side cover and the battery compartment lid are firmly closed.

To maintain the water and dust proof rating, internal packing replacement is required every two years (at cost).

\*3 Example of frequency-dependent comparator setting

RION Co., Ltd. is recognized by the JCSS which uses ISO/IEC 17025 (JIS Q 17025) as an accreditation standard and bases its accreditation scheme on ISO/IEC 17011. JCSS is operated by the accreditation body (IA Japan) which is a signatory to the Asia Pacific Laboratory Accreditation Cooperation (APLAC) as well as the International Laboratory Accreditation Cooperation (ILAC). The Quality Assurance Section of RION Co., Ltd. is an international MRA compliant JCSS operator with the accreditation number JCSS 0197.
